PROFESSIONAL EXPERIENCE

Infiforce
Chief Technology Officer (CTO) **Jan 2026 – Present**

- Lead embodied AI R&D, defining technology strategy and a roadmap aligned with business goals.
- Build and lead multidisciplinary research and engineering teams, overseeing hiring, mentorship, and cross-team collaboration.
- Architect embodied AI systems and infrastructure for model training, simulation, evaluation, and deployment.
- Build large-scale crowdsourced data collection and processing pipelines for embodied AI research and model development.
- Drive research prototypes toward production, establishing engineering standards, validation processes, and delivery milestones.
- Set R&D priorities and allocate resources, translating customer and partner requirements into technical plans.

Seeway.ai
Head of AI Infrastructure **Oct 2024 – Dec 2025**

- Led the development of AI infrastructure SaaS and PaaS platforms supporting internal autonomous driving teams across the data and model lifecycles.
- Directed the development of automated labeling algorithms and models, building a technical moat for the autonomous driving business.
- Productized these platforms as standalone commercial offerings, building an AI infrastructure business serving key accounts including BMW and Toyota.
- Oversaw data processing and annotation operations with approximately 1,000 staff, managing high-volume service delivery.

Holomatic, Beijing, Wuhan, Guangzhou, Suzhou, and Shanghai, China
Chief Architect **Jul 2022 – Aug 2024**

- Managed company-wide continuous integration (CI), software testing, and configuration management infrastructure.
- Led planning, control, prediction, localization, and mapping teams.
- Architected and delivered highway and urban pilot, automated parking, and memory parking products for OEMs including GAC and Chery.
- Improved R&D efficiency and software quality through automated in-vehicle issue triage, compute graph visualization, agile practices, and full-stack integration testing.
- Designed the company's AI infrastructure.

NVIDIA, Santa Clara, California, USA
Senior Engineering Manager, Architect **Mar 2017 – Jul 2022**

- Founding member of the driveAV organization and motion planning team; core member of the DriveWorks team.
- Architected and developed the full autonomous driving stack.
- Designed world model and driver intersection APIs for the Daimler project from 2020, collaborating with OEM function owners.
- Reported to the organization's vice president.

Faraday Future, Santa Clara, California, USA
Technical Specialist, Planning Lead **Jan 2016 – Mar 2017**

Baidu USA LLC, Sunnyvale, California, USA
Research Scientist, Control Lead **Jun 2015 – Jan 2016**
Developed autonomous driving software at Baidu IDL.

Education

University of California, Berkeley, Berkeley, California, USA

Ph.D., Mechanical Engineering, 2012–2015
Specialization in Control Theory

University of California, Berkeley, Berkeley, California, USA

M.S., Mechanical Engineering, 2010–2012
Specialization in Control Theory

University of Michigan, Ann Arbor, Michigan, USA

B.S., Mechanical Engineering (summa cum laude), 2008–2010

Shanghai Jiao Tong University, Shanghai, China

B.S., Mechanical Engineering, 2006–2008

Honors and Awards

University of California, Berkeley:
- J.K. Zee Fellowship, 2012

University of Michigan:
- Summa cum laude, 2010
- University Honors, 2009 and 2010
- Dean's List, 2009 and 2010

Shanghai Jiao Tong University:
- Chinese National Scholarship, 2008
- Academic Scholarship, 2007 and 2008

Patents and Publications

Patents

NVIDIA: 8 patents

1. Lane planning architecture for autonomous machine systems and applications
2. System and method for autonomous vehicle navigation
3. System and method for operating vehicles at different degrees of automation
4. System and method for planning a vehicle path
5. Safety procedure analysis for obstacle avoidance in autonomous vehicles
6. Lane change planning and control in autonomous machine applications
7. Efficient safety aware path selection and planning for autonomous machine applications
8. Behavior planning for autonomous vehicles

Patent portfolio on Justia

Faraday Future: 2 patents
